MAKINEN to deliver interiors for Antarctica21's new expedition vessel Magellan Discoverer

MAKINEN has signed a contract with Asenav shipyard in Valdivia, Chile, to deliver the interiors of Magellan Discoverer, a new expedition vessel for Antarctica21.

The MAKINEN scope covers all fixed furniture in passenger cabins and public spaces, as well as curtains and decorative lighting throughout the vessel. Installation is scheduled for spring 2026 in Valdivia. The interiors are designed by Tomas Tillberg Design, a long-time partner of MAKINEN in expedition vessel projects.

This project follows the delivery of seven Infinity-class vessels for SunStone Ships, where MAKINEN executed full turnkey interiors. That experience provides a strong foundation for Magellan Discoverer and continues to strengthen our role in expedition newbuilds.
